

Syed Muhammad Sufyan

Full Stack Developer & SaaS Builder

I build full stack products from scratch — architecture, backend, frontend, and deployment. Shipped **Terra Debugger** · Currently building **PostIdea**. Based in Karachi, teaching at Aptech, studying SE at SSUET. I work solo, move fast, and own everything end-to-end.

WORK EXPERIENCE

Faculty — Web Development & Programming

Apr 2025 – Present

Aptech Scheme 33

- Teaching web development and programming to 50+ students. Conduct live debugging sessions, design assessments, and mentor students on building practical projects.
- Previously a student and project team lead at Aptech — returned as faculty after completing the program, demonstrating recognition of technical and leadership performance.

Full Stack Developer

Aug 2024 – Mar 2025

WebVibe Studio

- Built and deployed client web applications using PHP, Laravel, and MySQL. Integrated third-party APIs including OpenAI for content automation workflows.
- Optimized database queries and implemented caching to improve application performance. Collaborated directly with clients on requirements and delivered scalable solutions.

EDUCATION

Bachelor of Science — Software Engineering

Oct 2024 – Oct 2027

Sir Syed University of Engineering and Technology (SSUET), Karachi

- Led project teams independently. Won shields for academic and project performance.

SKILLS

LANGUAGES

Python Java JavaScript TypeScript PHP

FRAMEWORKS

FastAPI Spring Boot React Laravel Flask

DATABASES

PostgreSQL MySQL Redis

TOOLS & DEVOPS

Docker Git GitHub Nginx Figma

AI & APIS

OpenAI API LangChain Groq REST APIs

PERSONAL PROJECTS

PostIdea IN PROGRESS

2026 – Present

Solo Founder · Full Stack Developer

[postidea.app](#)

AI-powered spec and architecture validation platform. Runs product ideas through a 5-stage pipeline — Socratic discovery, 4-agent council review, spec generation, rules-engine architecture design, and implementation verification. Catches contradictions like "realtime + offline-first" before you write a single line of code. Built solo end-to-end.

FastAPI · React · PostgreSQL · Redis · Docker · Nginx · Groq (LLaMA 3.3) · Alembic

Terra Debugger

Feb 2026 – Mar 2026

Solo Founder · Full Stack Developer

terradebugger.me ↗

SaaS platform for beginners to learn Python debugging in a secure Docker sandbox. Features guided error analysis, tiered hints, and reflection-based learning. Built and deployed solo — from architecture to production.

[Python](#) · [FastAPI](#) · [PostgreSQL](#) · [Redis](#) · [Docker](#) · [React](#) · [TypeScript](#) · [Tailwind](#)

Smart Exam Anti-Cheating & Seating Optimization System

Jan 2026 – Feb 2026

Solo Developer · System Architect

[GitHub](#) ↗

SaaS system using graph coloring and greedy algorithms to optimize exam seating, minimize cheating risk, and visualize conflict zones in real time. Processes 1000+ students. Led architecture and implementation solo.

[Java 17](#) · [Spring Boot](#) · [React](#) · [Vite](#) · [Tailwind](#) · [Maven](#)

AI Docs Assistant

Jan 2025

Solo Developer

CLI tool that auto-generates always-up-to-date documentation from any codebase. Supports JS, Python, Java, Go, and TypeScript. GitHub Actions integration auto-publishes docs on every push. 85%+ test coverage across unit, integration, and E2E tests.
