

Syed Muhammad Sufyan

Software Engineer | Full Stack & AI Products

Software engineer building full-stack products and AI-enabled developer tools. At Terra Labs, I took PostIdea from architecture through launch, including a VS Code extension, and build workflow solutions for logistics teams.

WORK EXPERIENCE

Software Engineer
Feb 2025 – Present

Terra Labs

- Took PostIdea from product architecture through FastAPI and React development to deployment as a live web application.
- Published a VS Code extension that brings architecture drift warnings and specification checks into the developer workflow.
- Built AI-assisted workflows for idea discovery, structured requirements, and architecture decisions; developing automation tools for freight and logistics operations.

Faculty — Web Development & Programming
Apr 2025 – Present

Aptech Scheme 33

- Teaching web development and programming to 50+ students. Conduct live debugging sessions, design assessments, and mentor students on building practical projects.

Full Stack Developer
Aug 2024 – Mar 2025

WebVibe Studio

- Built and deployed client web applications using PHP, Laravel, and MySQL. Integrated third-party APIs including OpenAI for content automation workflows.
- Optimized database queries and implemented caching to improve application performance. Collaborated directly with clients on requirements and delivered scalable solutions.

EDUCATION

Bachelor of Science — Software Engineering
Oct 2024 – Oct 2028

Sir Syed University of Engineering and Technology (SSUET), Karachi

- Led project teams. Won shields for academic and project performance.

SKILLS

LANGUAGES	Python, Java, JavaScript, TypeScript, PHP
FRAMEWORKS	FastAPI, Spring Boot, React, Laravel, Flask
DATABASES	PostgreSQL, MySQL, Redis
TOOLS & DEVOPS	Docker, Git, GitHub, Nginx, Figma
AI & APIS	OpenAI API, LangChain, Groq, REST APIs

PROJECTS

PostIdea

2026 – Present

postidea.app ↗ VS Code extension ↗

Live platform that turns product ideas into structured requirements, flags conflicting constraints, and checks implementations against locked specifications and architecture decisions. Backend, frontend, and extension have automated test suites and CI workflows.

FastAPI · React · PostgreSQL · Redis · Docker · Nginx · Groq (LLaMA 3.3) · Alembic

Terra Debugger

Feb 2026 – Mar 2026

terradebugger.me ↗ GitHub ↗

Deployed Python learning app with network-isolated, resource-limited Docker execution, error classification, reflection prompts, progressive hints, and learning analytics. Public repository includes tests for sandbox policy and the learning flow.

Python · FastAPI · PostgreSQL · Redis · Docker · React · TypeScript · Tailwind

Smart Exam Anti-Cheating & Seating Optimization System

Jan 2026 – Feb 2026

GitHub ↗

Exam seating optimizer using graph coloring and greedy allocation to identify subject conflicts. Includes CSV import, risk visualization, multi-hall management, and PDF seating chart export.

Java 17 · Spring Boot · React · Vite · Tailwind · Maven

AI Docs Assistant

Jan 2025

Node.js CLI for generating documentation from JavaScript, Python, Java, Go, and TypeScript projects, with GitHub Actions integration to refresh docs on push.

Node.js · JavaScript · GitHub Actions
